H G S T

Ultrastar[®] SSD800MM

Highlights

- MLC NAND Flash for ultra-high performance and endurance
- Endurance: 10 drive writes per day (DW/D) for five years
- Best IOPS/Watt for reduced TCO
- 12Gb/s SAS interface for maximum throughput
- Advanced power loss data management technology
- Self-encrypting models conform to TCG's Enterprise specification

Applications/Environments

- Ultra-high performance tier-0 enterprise storage
- Enterprise-class servers and high performance computing
- Space and/or power constrained environments
- Online Transaction Processing (OLTP)
- Video pre/post-production
- Financial and e-commerce
- Database analytics

The Ultrastar SSD800MM delivers high sequential throughput, up to 1200MB/s read and 700MB/s write (12Gb/s SAS). The Ultrastar SSD800MM also delivers up to 145,000 read and 70,000 write IOPS, reaching speeds >100 times faster than HDDs and double the speed of current 6Gb/s SSDs, allowing rapid access to "hot" enterprise data for improved productivity and operational efficiency. The Ultrastar SSD800MM family offers significant value in terms of IOPS per Watt, while reducing total cost of ownership (TCO) through low power consumption, efficient cooling and reduced space requirements.

The Ultrastar SSD800MM family combines enterprise-grade MLC NAND flash memory, advanced endurance management firmware and power loss data management techniques to extend reliability, endurance, and sustained performance over the life of the SSD. The Ultrastar SSD800MM family achieves an extraordinary 0.44% annual failure rate (AFR) or two million hour mean-time-between-failure (MTBF). The 800GB capacity model endures up to 14.6 Petabytes (PB) of random writes over the life of the drive—the equivalent of writing 8 Terabytes (TB) per day for five years.

For complete end-to-end data protection and reliability, the Ultrastar SSD800MM family incorporates the T10 Data Integrity Field (DIF) standard, extended error correction code (ECC), Exclusive-OR (XOR) parity to protect against flash die failure, parity-checked internal data paths without an external write cache, and an exclusive power loss data management feature that does not require supercapacitors. The Ultrastar SSD800MM family is backed by a five year limited warranty, or the maximum Petabytes (PB) written (based on capacity).

HGST Enterprise StorageExperience

HGST leverages decades of proven enterprise storage expertise in Serial Attached SCSI (SAS) design reliability, firmware, customer qualification and system integration to the Ultrastar® SSD800MM solid-state drive (SSD) family. The synergistic relationship between HGST's throughputenhancing SSDs and traditional HDDs provides cost effective, end-to-end enterprise-class storage solutions, delivering reliability, compatibility, capacity, cost and system performance. This combination makes HGST a leading SSD/ HDD provider with the experience and technology needed to meet escalating reliability, endurance and performance in the most demanding enterprise environments.

HGST Quality and Service

HGST's Ultrastar SSD800MM family extends the company's long-standing tradition of performance and reliability leadership. A balanced combination of new and proven technologies enables high reliability and availability to customer data.

HGST drives are backed by an array of technical support and services, which may include customer and integration assistance. HGST is dedicated to providing a complete portfolio of SSD/HDD solutions to satisfy today's monumental computing needs.

| | Performance | Power | Capacity | Reliability | Integration |
|------------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|--------------------------------------------------|----------------------------------------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|--------------------------------------------------------------------------------------------------------------------------|
| Feature/function | SAS 12Gb/s MLC NAND flash memory 1150MB/s / 700MB/s sequential R/W 145K / 70K IOPS random R/W 110K IOPS on 70/30 mix R/W | 9.0 and 11.0 Watt options | • 800GB • 400GB • 200GB | 0.44% AFR (2M hours MTBF) 1E-17 bit error rate T10 end-to-end data protection Exclusive-OR (XOR) NAND Power loss data management Unlimited reads, up to 14.6PB random writes (800GB) | HDD architecture commonality Systems integration and test lab |
| Benefit | 6Gb/s Active-Active Dual Port or 12Gb/s Single/ Dual port for enhanced reliability Highest write performance and endurance Maximum throughput and IOPS for ultra-fast access to data; >100x faster than typical HDD | Improved performance with higher power option | More capacity for less space and power | Reduced field replacement effort Enhanced error detection and correction for optimal data integrity Protection against flash die failure Assures data integrity during power failure Maximum endurance over the life of SSD | Compatibility with Ultrastar SAS HDDs Extensive interoperability and compliance testing |

800GB, 400GB and 200GB | MLC 2.5-inch SFF | SAS 12Gb/s

¹One gigabyte (GB) is equal to one billion bytes, one terabyte (TB) is equal to 1,000GB (one trillion bytes), and one petabyte (PB) is equal to 1,000TB (one quadrillion bytes) when referring to solid-state drive or hard drive capacity. Accessible capacity will vary from the stated capacity due to formatting and partitioning of the drive, the computer's operating system, and other factors.

²MTBF target is based on a sample population and is estimated by statistical measurements and acceleration algorithms under nominal operating conditions. MTBF ratings are not intended to predict an individual drive's reliability. MTBF does not constitute a warranty.

How to Read the Ultrastar Model Number

HUSMM8080ASS200 = 800GB, SAS 12Gb/s

- H = HGST
- U = Ultrastar
- S = Standard
- MM = Multi level cell,
- mainstream endurance (10DW/D) 80 = Full capacity (800GB)
- 00 Tull capacity (0000b)
- 80 = Capacity of this model (80 = 800GB, 40 = 400GB, 20 = 200GB)
- A = Generation code
- S = Small form factor (vs. L for Large FF)
- S2 = Interface, SAS 12Gb/s
- 0 = Reserved
- 0 = Crypto sanitize (1 = TCG encryption, 4 = No encryption, 5 = TCG + FIPS certified encryption)
